

# Struggling to boost efficiency?

Our Lean Six Sigma Yellow Belt Training Programme gets everybody involved in Continuous Improvement

## MAKE CONTINUOUS IMPROVEMENT A HABIT!

CI Projects specialises in delivering organisational change through the use of Lean Six Sigma. We believe that the philosophy of Lean Six Sigma is for everyone, which is why we've developed a simple and effective training programme aimed at people of all levels.

The training equips delegates with an understanding of the core principles and methodology, and an easy-to-use toolkit that can be applied to all continuous improvement initiatives, big or small.

## 1 A PROGRAMME THAT TRULY DELIVERS A RETURN ON INVESTMENT (ROI)

We often hear stories about companies failing to achieve an adequate ROI on their Lean Six Sigma training investment. Our research suggests that companies invest in expensive higher-level training that has a large dropout rate because advanced statistical analysis isn't everyone's cup-of-tea. Another contributing factor is the lack of senior leadership commitment. Our approach combats these common failures by:

1. Engaging with senior leadership first to ensure they have a basic understanding of Lean Six Sigma
2. Delivering a programme that's purposeful, applicable to all types of projects and easy to understand without too much jargon!
3. A cost-effective range of options including the option to include mentoring post-training

## HIGHER PROJECT BENEFITS

Using Lean Six Sigma Methodologies

## 2 YELLOW BELT TOPICS

Basic Principles of Lean Six Sigma

DMAIC Framework

Waste, Value Stream & Process Mapping

Voice of the Customer

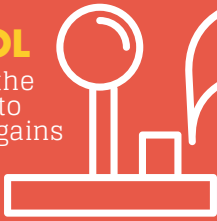

Problem Solving Techniques

Solution Creation, Blue-Sky Thinking

# 3 DMAIC FRAMEWORK

**CONTROL**  
Maintain the solution to sustain the gains

**DEFINE**  
Define the problem and requirement

**MEASURE**  
Understand the current process & performance to establish a baseline

**IMPROVE**  
Generate, implement & verify solution

**ANALYSE**  
Identify the cause of the problem

**Key Ingredients:**  
Sponsorship, Change Management

**Manufacturing**

**A BIG FAT MYTH!!**

**Services**

Business, whether manufacturing or service related, all provide some form of product to their customers. Lean is about creating more value for customers with fewer resources. Six Sigma is a set of data-driven techniques and tools for process improvement.
