This training was the most worthwhile training I have undertaken in many years

Introduction to Project Management

Discover what it takes to become an effective Project Manager.

Ideal for those recently tasked with delivering a project alongside their day job, or those with indirect responsibility for project delivery or matrix managing project delivery teams.

Leading Change differently using Storytelling, Conversation and Inquiry

Based on academic research and experience, Dr. Susanne Evans has developed the ChangeStories™ method. For leaders and change practitioners who want to have meaningful conversations about change, reduce resistance to change and enable the benefits of a change programme to be realised.

Change Management Training

Enhance your Change Management skills through our Change Management training. Developed and delivered by our Change Management experts, this course provides a balance of theoretical and hands-on learning so that you can hit the ground running.

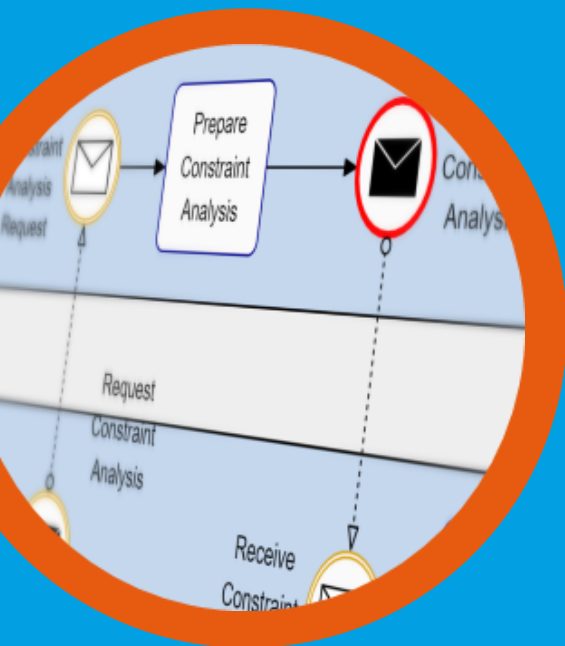

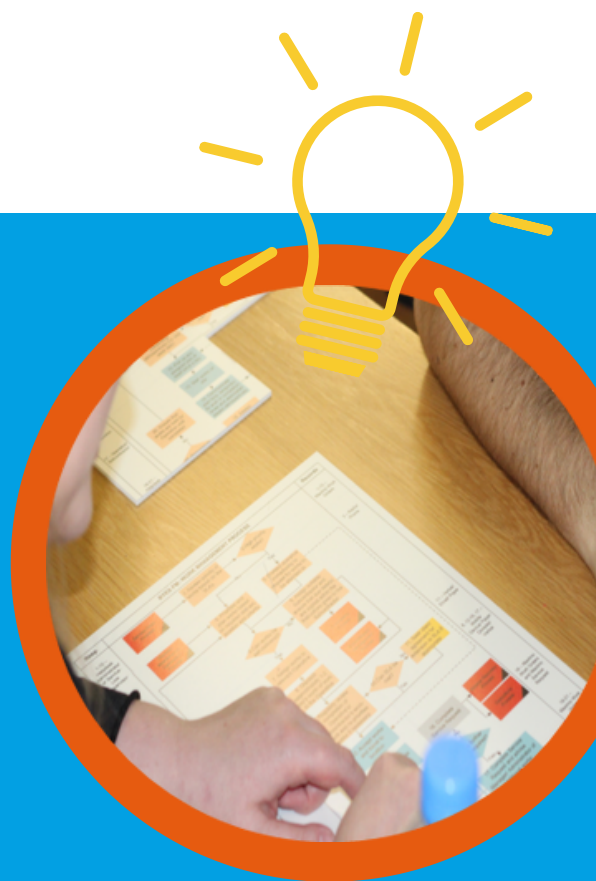

It was really insightful and definitely something that we can all take away and use in our day jobs, to help improve the business and our current processes. The course was delivered excellently and I thought it will fantastic all the way through.

Process Mapping Fundamentals

Process maps provide insight into a process, help teams brainstorm process improvement ideas, increase communication and provide process documentation.

Understand how to capture and articulate processes with our process mapping fundamentals training, perfect for beginners!
